CAREER OBJECTIVE

Aspiring System Design Engineer with a proven track record of architecting scalable, high-availability solutions and leading cross-functional teams in Agile environments. Experienced in bridging the gap between complex requirements and production-ready deployments, having successfully steered a development team to optimize backend performance by 20%. Passionate about leveraging RAG (Retrieval-Augmented Generation), distributed systems, and security-first development to build robust infrastructures that solve critical business challenges and drive organizational growth.

TECHNICAL SUMMARY

- **Software Development & Frameworks:** Proficient in Full Stack development using Python, JavaScript (Node.js, Express, Fastify, Flask), and ReactJS. Experienced in building responsive UIs with HTML5, CSS3, and Tailwind CSS.
- **System Architecture & AI:** Designing scalable, high-availability infrastructures, distributed systems, and Retrieval-Augmented Generation (RAG) pipelines. Expertise in vector databases (pgvector) and LLM orchestration (LangChain, Gemini, Llama).
- **Databases & Data Management:** Expertise in relational and NoSQL databases including PostgreSQL, MySQL, MongoDB, and SQLite. Skilled in ORM tools like Prisma and caching layers like Redis.
- **DevOps & Cloud Infrastructure:** Competent in containerization (Docker), CI/CD automation (GitHub Actions), and cloud deployment (AWS, Vercel, Render). Experienced in workflow automation using n8n.
- **Security & Testing:** Strong background in penetration testing, vulnerability assessment, and incident response. Proficient in API testing (Postman), unit testing, and real-time security scanning (ClamAV).
- **Methodologies:** Advanced knowledge of the Software Development Lifecycle (SDLC), Agile/Kanban methodologies, and technical documentation. Proven track record of leading development teams and mentoring 250+ students.

INTERNSHIPS & EXPERIENCE

AuxaCode Solutions | Coimbatore, Tamil Nadu (1.5 month)

Full Stack Developer (Client Deployment) *Sep 2025 – October 2025*

- Worked on a client project, contributing to scalable frontend-backend integration using modern JavaScript frameworks, Supabase and API design principles.
- Collaborating with cross-functional teams to deliver optimized, production-grade features with clean CI/CD workflows and security-focused development practices.

Techsnapie Solutions | Coimbatore, Tamil Nadu (2 years 2 months)

Development Team Lead (8 months) *Nov 2024 – Jul 2025*

- Led a 6-member development team to build RESTful APIs for multiple enterprise projects, improving backend response time by 20%.
- Adopted Agile and Kanban methodologies to streamline task management, sprint velocity, and client delivery.

Penetration Tester (4 months) *Aug 2024 – Oct 2024*

- Assisted solution teams in identifying and mitigating 15+ client-side security vulnerabilities.
- Conducted vulnerability assessments, documented exploit chains, and supported compliance readiness through detailed technical reporting.

Web Developer (14 months) *May 2023 – Jul 2024*

- Delivered 7+ client web solutions, improving performance by up to 30% through efficient API consumption and frontend optimization.
- Participated in end-to-end SDLC phases, including requirement analysis, deployment, and version control.

IBM & Edunet Foundation (2 months)

Cybersecurity Intern *Jan 2025 – Feb 2025*

- Completed 40+ hours of hands-on cybersecurity training on IT risk management, incident response, and threat mitigation.
- Gained exposure to enterprise-grade tools and frameworks for risk assessment through guided labs.

PROJECTS

Ops-Sentinel (Autonomous Incident Responder) *– Node.js | Redis | Supabase (pgvector) | Llama-3.1-8B*

- Developed an enterprise-grade SRE platform using Retrieval-Augmented Generation (RAG) to provide grounded remediation steps for production incidents, significantly reducing Mean Time to Resolution (MTTR).
- Engineered a high-performance log monitoring pipeline with a Redis-backed sliding window and Supabase vector storage to analyse causal chains and automate root-cause analysis for system crashes.

Zentellect *– React 19 | Fastify | Supabase (pgvector) | Llama 3.1 | LangChain*

- Developed an adaptive AI-powered Ed-Tech SaaS that utilizes Llama 3.1 and RAG to transform static PDF materials into comprehensive, level-specific courses (Beginner to Advanced).
- Built an intelligent coding ecosystem featuring a live execution environment via Piston API and an automated testing suite that validates solutions against AI-generated hidden test cases.

Study Sync AI *– ReactJS | NodeJS | Google Gemini AI | PosgreSQL*

- Architected an AI-powered educational platform using Google Gemini to generate personalized study schedules and assessments, reducing planning time for users.
- Engineered a full-stack system with Supabase (PostgreSQL) and Prisma ORM to manage user authentication, task tracking, and real-time performance analytics.

Exoplanet Predictor (NASA Space App Challenge) *– Scikit-learn | ReactJS | Node.js*

- Built an ML model using NASA's Exoplanet Archive to classify celestial data as exoplanet or false positive with 99% accuracy.
- Deployed it via a Node.js API with a Vite-React frontend, improving data validation for astronomical research and classification efficiency.

AI Integrated Transcriber *– ReactJS | Node.js | Gemini AI*

- Tackled multilingual communication gaps by building an AI-driven voice and text translator.
- Used Gemini AI to provide context-aware, real-time transcription and translation, enhancing accessibility across languages.

EV Route Optimizer – ReactJS | n8n | Gemini AI | Google Maps API

- Solved inefficient EV route planning due to limited range and charging points.
- Developed an intelligent workflow with n8n and Gemini AI that uses vehicle data to suggest optimal, charge-friendly travel routes.

WittyGuard – Smart Password Generator AI *– ReactJS | Node.js | Gemini*

- Addressed password security and memorability challenges using AI-based evaluation.
- Integrated Gemini AI to generate human-friendly yet secure passwords after analysing user password strength.

File Scanner *– MERN Stack | Docker | Clam AV*

- Solved the challenge of detecting infected or corrupted files during upload.
- Built a containerized Node.js backend integrated with Clam AV to scan files and report integrity via a React dashboard.

Manager–Employee Feedback System *– ReactJS | Flask | Docker | SQLite*

- Improved workplace communication and feedback transparency between managers and employees.
- Designed a structured feedback system with role-based access, containerized Flask backend, and real-time updates on the React frontend.

P2Peek – Secure Communication Platform *– ReactJS | React Native | WebSocket | Node.js*

- Developed a multi-version secure communication system evolving from TCP sockets to WebSocket to HTTP sockets.
- Enabled encrypted, real-time messaging across web and mobile, enhancing data privacy and connection stability.

Intern Data Management – ReactJS | Node.js | Google Sheets API | Google Drive API

- Streamlined intern tracking by integrating Google Sheets and Drive data into a unified dashboard.
- Displayed real-time intern progress and project insights through an organized React-based interface.

Subdomain Finder *– Python | Requests*

- Automated the process of subdomain enumeration to aid penetration testing and reconnaissance.
- Scans and lists all available subdomains of a target domain, improving visibility and security assessment.

Phishing Link Finder *– Python | BeautifulSoup | Google Search API*

- Built an anti-phishing utility that validates URLs by comparing sender links against top Google results.
- Detects and flags suspicious or mismatched domains, enhancing user safety against social engineering attacks.

ChroMakit *– OpenCV | ReactJS | WebRTC*

- Designed for color-blind users to distinguish specific colors in real time.
- Used OpenCV to mask the chosen color with white and the rest with black, improving visibility and object recognition

EDUCATION

- **BE Computer Science and Engineering (Pursuing) – 8.75 CGPA**
  SNS College of Technology, Coimbatore (Nov 2022 – Apr 2026)

LEADERSHIP & AWARDS

- **GitHub Contributor:** C+ Rank, 90+ repositories, 400+ yearly contributions, managing 5+ well-documented FOSS projects.
- **Mentor:** Trained 250+ students in Frontend Development, Full Stack Development, and LeetCode problem-solving.
- **Event Coordinator:** Organized Capture the Flag (CTF) sessions and First-Year Induction Programs for 150+ attendees.
- **Hackathons:** NASA Space App Challenge, AWS Academy Partyrock Hackathon Campus Finalist, SAP Hackathon (Level-2 qualifier), Smart India Hackathon Campus Finalist.

CERTIFICATIONS (native format)

- **Cloud & Artificial Intelligence:** AWS Academy Graduate (Cloud Foundations & Generative AI Foundations) | Cloud Audit Academy (AWS Agnostic) | Deep Dive with Security: AWS IAM | Microsoft Security Copilot | IBM Enterprise Design Thinking (Practitioner, Co-Creator, & AI Team Essentials).
- **Cybersecurity & Defense:** IBM Cybersecurity Fundamentals | Cisco Introduction to Cybersecurity | Microsoft Career Essentials in Cybersecurity | LinkedIn Cybersecurity Foundations | Mastercard & Tata Group Cybersecurity Job Simulations | Cybersecurity Awareness & Terminology.
- **Offensive Security & Ethical Hacking: NPTEL** Ethical Hacking | Introduction to Offensive Security | Metasploit from Scratch | Threat Hunting Essential Training | SQL Injection (Ethical Hacking) | Developing Ethical Hacking Tools with Python | EC-Council Cisco Labs Crash Course | PrepInsta Cyber Security Certification.
- **Software Engineering & DevOps:** NASBA DevOps Foundations (DevSecOps) | Cisco Python Essentials | Python Nanodegree | Using Python for Automation | IoT Foundation & Fundamentals | Python for Placement Readiness (byteXL).
- **Core Programming & Web:** PrepInsta (Intermediate Coding in Java, HTML) | HackerRank (Python & JavaScript Basics) | Data Science & Analytics (NASA Space App Challenge participation)

CERTIFICATIONS (custom format)

<u>Cloud & Artificial Intelligence</u>

AWS Academy, IBM, & Microsoft

- AWS Academy Graduate: Completed Cloud Foundations and Generative AI Foundations.
- Cloud Audit Academy: Specialized in Cloud Agnostic Amazon Web Services (AWS) frameworks.
- Security Deep Dive: Advanced training in AWS Identity and Access Management (IAM).
- AI Design Thinking: Earned IBM Enterprise Design Thinking certifications for Practitioner, Co-Creator, and AI Team Essentials.
- AI Tools: Certified in Microsoft Security Copilot for AI-driven threat mitigation.

<u>Cybersecurity & Infrastructure Defence</u>

IBM, Cisco, Microsoft, & Forage

- Enterprise Security: Completed IBM Cybersecurity Fundamentals and Cisco Introduction to Cybersecurity.
- Career Essentials: Microsoft and LinkedIn certifications in Cybersecurity Foundations and Terminology.
- Professional Simulations: Successfully completed Cybersecurity Job Simulations with Mastercard and Tata Group via Forage.
- Threat Awareness: Advanced training in the Cybersecurity Threat Landscape and Global Security Standards.

<u>Offensive Security & Ethical Hacking</u>

NPTEL, EC-Council, & Udemy

- Ethical Hacking: NPTEL and LinkedIn certifications in Ethical Hacking and SQL Injection methodologies.
- Tool Development: Trained in developing customized Ethical Hacking tools using Python.
- Technical Reconnaissance: Completed Metasploit from Scratch and EC-Council Cisco Labs Crash Course.
- Threat Hunting: Certified in Threat Hunting Essential Training and Offensive Security fundamentals.

<u>Software Engineering, DevOps & Programming</u>

NASBA, Cisco, & HackerRank

- DevOps & Security: Certified in DevOps Foundations and DevSecOps via NASBA.
- Python Programming: Earned Cisco Python Essentials, Python Nanodegree, and Python for Automation certifications.
- Core Development: Certified in Intermediate Java Coding (PrepInsta) and HTML/CSS fundamentals.
- Verified Coding Skills: Gold-level proficiency in Python and JavaScript Basics on HackerRank.
